*T*HE Joseph F. Martin Company's Spring Message to the fine Horticultural Family that we proudly address as friends and patrons, could hardly discuss anything but war-time, and the thrust of its pressure on us all.

The valiant fighters who defend today's principles, will demand and be entitled to their reward on the morrow. It is from this that we draw our inspiration. Our duty is clearly outlined, for, as horticultural tradesmen, our combined creative effort keeps America beautiful to come home to.

Consider well the role of hardy plants in this. As always, we recognize that their attractiveness is unexcelled anywhere, and that their seemingly endless practical utility makes possible their application to almost every work that plant craftsmen do.

Beyond this, and all important now, they respond to casual culture, requiring a bare minimum of time and labor or critical supplies. In garden or decorative work they make a brilliant show, and in floristry they produce abundant crops of the finest flowers; all this from small investment and limited effort.

Can we help but conclude that perennials are just plain GOOD SENSE in the war-time operation of our mutual enterprise? We are happy to report that our fine perennials are in good supply, and to pledge that, in face of everything that may occur, we will continue to serve our customer family with a deep sincerity, to merit your faith in us now and through a brighter, peaceful future.

Yours for Victory,

## Orchid Beauty

(SEE COLOR ILLUSTRATION ON BACK COVER)

A splendid, new variety of soft cattleya-orchid with a brilliant orange eye. It is near the well-known Fortune Hortiwegi in color but is twice the plant in any consideration. In our nurseries the flower spikes are easily twice as long and are brilliantly in flower from the very tip to the base at the SAME TIME. Consider a moment its many outstanding traits and you will be sure that no other variety represented as it is, well compare with it. It is an extremely valuable addition to the Buddleia line.

2¼ Inch Pots, Per 10, \$2.00; Per 100, \$15.00

## Royal Purple

Color is a rich glowing purple, such a distinctive shade that it defies good description. Each large panicle seems to be lighted from within, on effect that yards of wordage cannot accurately convey. The bush is completely covered with long, sturdy spikes from July until frost. It attains a height of 4 to 5 feet. Royal Purple is now in its second year of introduction and it has already established itself by our test and by the practical appraisal of our many customers who bought it last year. It is really good, being especially appropriate for use as a florist cut flower item.

Our whole effort has been directed to wholesaling plants of quality to the trade alone—thereby insuring that our complete facilities are always directed toward the production of good things for the tradespeople alone. It is this spirit that has given us life and has fostered our growth. ### HARDY VINCA

#### MYRTLE

This popular plant with its beautiful, glossy ever green foliage will flourish on sloping land, hill-sides, in partial or dense shade or in open sunshine and particularly where nothing else will grow. It makes a very desirable flowering ground cover. Those with cemetery business use Vincas as grave covers and in hanging baskets to great advantage. A nice planting of these is always good to have.

**MINOR.** A trailing, evergreen plant, used extensively for carpeting the ground under shrubs or trees or on graves where it is too shady for grass or other plants to thrive.

Per 10, \$1.50; Per 100, \$10.00

**MINOR BOWLES VARIETY.** A very attractive variety, having runners of glossy evergreen foliage. Like Minor, it does not brown during the hot summer days. Flowers are bright blue produced in great profusion in early spring with a sprinkling of bloom during the summer. A very compact grower and one of the best ground covers.

2" Pots, Per 10, \$1.65; Per 100, \$11.00

**RUBRA FLORA PLENA.** We have grown this variety for four years and found it to be perfectly hardy in our climate. It has the appearance of a very strong growing type, carrying a heavy setting of foliage from the crown to the tip of the branches. The double and semi-double flowers, often appearing on the same plant, are a striking mahogany red. We have every reason to believe that as soon as this Vinca is generally available it will become very popular.
